

Is solar panel electricity worth it

Overview

Here's the truth: For most homeowners, solar panels are absolutely worth it. The average solar shopper saves between \$37,000 and \$154,000 over 25 years—not including any potential incentives—transforming what feels like a significant upfront cost into substantial long-term. With current tax credits and incentives, the average payback period for solar panels is between six and 10 years. " If you pay cash, the average system costs \$13,962 to \$27,924 before any government help or incentives. Most people break even in 6 to 12 years. But is it the right time -- and the correct choice -- for your home?

Solar energy and panels have many pros, from the obvious benefits of saving on energy costs. Solar panels can still reduce your monthly electricity bills—perhaps even to zero—and may boost your home's resale value over time.
