

# Is there solar power generation in Dameisha

## Overview

---

The area has reduced its energy consumption via photovoltaic power generation and storage, application of energy-saving materials and intelligent power use technologies. At Dameisha Community in Yantian District, the practice of building a near-zero carbon community has been used as a typical example of China's efforts in ecological conservation and protection at the sideline activities of the 27th Conference of the Parties of the United Nations Framework. Green Power is electricity generated from renewable energy sources that are environmentally friendly such as solar, wind, biomass, and hydropower. New York State and the Public Service Commission have made a commitment to promote the use of Green Power and foster the development of renewable energy. Access the full content of the database in real time with the DSIRE API: <https://www. org/dsire-api/> DSIRE has teamed-up with EnergySage to help you go solar. In addition, you can access large-scale solar projects that participate.
