

Italy battery research and development

Overview

Italy is pushing forward in developing new batteries for electric vehicles. Researchers and businesses are working on more sustainable, powerful, safe, and affordable batteries. To showcase these efforts, “Battery Day 2025,” Italy's first networking event for the battery industry, will take place. Italy is at the forefront of the development of new batteries for electric mobility, with numerous current research projects for the creation of a new generation of increasingly sustainable, high-performance, safe and low-cost storage devices. ENEA is experimenting with classes of new materials. The Italian utility-scale battery storage market is one of the most exciting in Europe. Just under 4GWh is completed and/or operational, with a further 2GWh+ under construction. Scheduled to open in 2025, the Italtel site will cover more than 300,000 m².

Italy battery research and development

[The implications for Italy of the new EU battery regulation](#)

Italy boasts world-class research centers that contribute to innovation in the field of batteries. The Italian manufacturing tradition plays a significant role, producing key players in the development of ...

[Facts, Geography, History, Flag, Maps, & Population](#)

Geographical and historical treatment of Italy, including maps and a survey of its people, economy, and government. Italy comprises some of the most varied and scenic landscapes on ...

[Visit Italy Official: Holidays, experiences and tourist information for](#)
