

Kitchen cabinets can be reused

Overview

Yes, kitchen cabinets can be removed and reused as long as they're detached carefully without damaging the frame or mounting points. They're often repurposed in garages, laundry rooms, workshops, or resale projects where sturdy cabinetry is needed. Reuse them in other areas of your home. If you have a nook in your house that can fit a built-in office area, repurpose those old cabinets to make yourself a compact space where you can work from home, pay bills and keep. Kitchen cabinets, often a significant investment in home renovations, don't necessarily need to end up in a landfill when a kitchen remodel is planned.
