

Large-scale procurement of energy storage battery cabinets

Overview

This guide explains what battery energy storage system wholesale really means, how it differs from retail energy storage, and how project owners, EPCs, and integrators can evaluate wholesale BESS solutions from both a technical and strategic perspective. As battery energy storage systems (BESS) become a core component of modern power infrastructure, procurement models are evolving just as quickly. For commercial, industrial, and utility-scale projects, energy storage is rarely purchased as a single product. Jared Spence of IHI Terrasun explores some steps developers should follow to reduce exposure. With projects like State Grid Gansu's 291kWh solid-state battery cabinet procurement (¥645,000 budget) [1] and Southern Power Grid's 25MWh liquid-cooled cabinet framework tender [10], bidding opportunities are. In this Energy Storage News Webinar, CEA's energy storage experts take a deep dive into BESS procurement strategies with guidance and advice on how to navigate this complex landscape.
