

# Malaysia energy storage regulations

## Overview

---

As Malaysia accelerates its renewable energy ambitions, Battery Energy Storage Systems (BESS) are becoming an integral part of the energy equation—not only as a compliance requirement under the new 2025 SELCO Guidelines (referring to Clause 3. 8), but as a strategic solution to enhance. KUALA LUMPUR (Feb 14): The Federation of Malaysian Manufacturers (FMM) has urged the government to review guideline requirements for battery energy storage systems (BESS) and monthly standby charges under the self-consumption (SelCo) programme for solar power. The federation noted that the two key. In March 2025, Malaysia took a significant step towards regulating carbon management by passing the Carbon Capture, Utilization, and Storage (CCUS) Bill 2025. This legislation has been anticipated by energy companies, including U. BESS offers not only environmental benefits but also lucrative investment opportunities.
