

Mexico solar supporting energy storage policy

Overview

The Mexican government announced in March 2025 a first-of-its-kind measure in the region: all solar and wind power plants must integrate battery systems equivalent to 30% of their installed capacity, with a minimum of three hours of discharge. Recently, the Mexican Ministry of Energy announced a new regulation mandating that all newly built wind and solar PV projects must be. Mexico is seeing a surge of large-scale solar and battery storage proposals across multiple states following an October decree that sets clearer rules for private energy investments. Electric energy storage has become a crucial component in the transition to more sustainable, reliable and efficient energy systems.

Mexico solar supporting energy storage policy

[Mexico Solar 2026: Growth Meets the Storage Bottleneck](#)

Mexico's own planning documents acknowledge the scale of the challenge ahead, pointing to the need for approximately 8-9GW of energy storage capacity by the mid-2030s to support higher levels of ...

[Mexico advances new wave of large-scale solar and storage projects](#)

Mexico is seeing a surge of large-scale solar and battery storage proposals across multiple states following an October decree that sets clearer rules for private energy investments.

- ✓ 50KW/100KWH
- ✓ HIGHER POWER OUTPUT IN OFF-GRID MODE
- ✓ CONVENIENT OPERATION & MAINTENANCE
- ✓ PRE-WIRED

[Clean energy transition in Mexico: Policy recommendations for the](#)

Based on a comparative policy analysis between Mexico, the US and Germany, this paper seeks to provide policy recommendations to incentivise the deployment of energy storage ...

[Mexico emerges as benchmark for energy storage development in ...](#)

By combining specific regulations, a storage mandate for new renewable projects, and long-term planning, Mexico is emerging - according to OLADE - as a regional benchmark for energy ...

[Mexico's New Energy Storage Policy Shakes Up Global Market](#)

Recently, the Mexican Ministry of Energy announced a new regulation mandating that all newly built wind and solar PV projects must be equipped with energy storage systems accounting for ...

[Mexico's New Energy Storage Regulations Require 30% Battery Storage ...](#)

According to the regulations promulgated in March 2025, all new solar and wind power projects must be equipped with battery systems equivalent to 30% of their installed capacity, with a ...

[Mexico Battery Storage Mandate: What It Means for Renewables](#)

Mexico has taken a bold step in reshaping its renewable energy sector by mandating that all new wind and solar projects include battery storage equal to 30% of their capacity.

[Electric storage in Mexico: challenges and progress](#)

Thanks to the country's geographical conditions, Mexico has great potential for solar and wind energy, which makes it an ideal candidate for the implementation of energy storage systems to ...

[The Potential For Energy Storage In Mexico](#)

Mexico can unlock the full potential of energy storage solutions by fostering greater integration of renewable energy, supporting grid stability, and improving regulations related to battery storage.
