

Microgrid Design Goals

Overview

The MSWG aimed to bring together NARUC and NASEO members to explore the capabilities, costs, and benefits of microgrids; discuss barriers to microgrid development; and develop strategies to plan, finance, and deploy microgrids to improve resilience. This white paper focuses on tools that support design, planning and operation of microgrids (or aggregations of microgrids) for multiple needs and stakeholders (e. Microgrids for Energy Resilience: A Guide to Conceptual Design and Lessons from Defense Projects. In fall 2019, the National Association of Regulatory Utility Commissioners (NARUC) and the National Association of State Energy Officials (NASEO) initiated a joint Microgrids State Working Group (MSWG), funded by the U. Department of Energy (DOE) Office of Electricity (OE). Proclivity doesn't always result in productivity. However, the traditional model is changing.
