

Microgrid Project Tripartite Agreement

**FLEXIBLE SETTING OF
MULTIPLE WORKING MODES**

Overview

Directs Pacific Gas and Electric (PG&E), San Diego Gas and Electric (SDG&E) and Southern California Edison (SCE) to establish a new Microgrid Incentive Program (MIP) agreement with special provisions for local and tribal government MIP Grant Awardees. A microgrid is comprised of distributed energy resources (DERs) interconnected through the site's electrical distribution system and provides power to designated critical loads upon loss of the serving utility. Send us an email indicating your interest. We'll schedule a consultation to determine if a community microgrid is right for you. You'll also engage with the technical engineering firm to help you. Microgrid Development Agreements are legally binding contracts established among various stakeholders—such as utilities, local governments, private developers, and community groups—that govern the construction, financing, operation, and ownership of localized, semi-autonomous energy distribution. This report was developed for and sponsored by the U. Department of Energy's Federal Energy Management Program (FEMP) with Rachel Shepherd as the program manager and lead reviewer. Additional FEMP reviewers include Tracy Niro, Skye Schell, Joanne Lowry, Hayes Jones, Anne Hampson, and Hannah. A microgrid can provide reliable backup power to critical loads when electric utility power is interrupted, and may also provide value during normal operations.

Microgrid Project Tripartite Agreement

[How to Structure a PPA for a Microgrid Project](#)

Learn how to structure a power purchase agreement (PPA) for a microgrid project, and what are the benefits and risks of this financing and implementation option.

[Financing Microgrids in the Federal Sector](#)

This paper explores procurement options and agreements that may be useful to federal agencies interested in implementing microgrids at their sites. Microgrid complexities, implementation considerations, and ...

[Microgrid Development Agreements -> Area -> Sustainability](#)

These agreements are fundamental to the establishment of critical energy infrastructure, delineating the physical and operational boundaries of the microgrid system, which provides local energy security and enhanced ...

[Microgrid Incentive Program \(MIP\) Handbook](#)

Innovative solutions like microgrids can increase local energy resilience and reliability, and reduce emissions. Microgrids allow the three California IOUs to continue delivering electricity when ...

[Kickstart Your Federal Microgrid Project: Financing Opportunities ...](#)

If an agency is implementing a microgrid in multiple phases (potentially using multiple funding mechanisms), it is important that the overall concept is well-defined in the early project planning.

[Microgrid System Project Development Checklist](#)

The included items are intended for use in the development of a commercial-scale microgrid and help identify the key actions to be taken during the project planning, design, procurement, and implementation phases.

[Microgrid Incentive Program](#)

Then together we'll prepare a microgrid operating agreement. This agreement lays out important terms and conditions like how the microgrid will be developed and operated.

Financing Federal Microgrids

Bilateral agreement between a federal agency and its serving distribution utility for service connection, demand side management services, "special facilities services" or other service options.

PUBLIC UTILITIES COMMISSION OF THE STATE OF CALIFORNIA

Directs Pacific Gas and Electric (PG& E), San Diego Gas and Electric (SDG& E) and Southern California Edison (SCE) to establish a new Microgrid Incentive Program (MIP) agreement with special ...
