

# Nassau downgrades PV module exports

## Overview

---

Nassau, historically a mid-sized player in solar panel exports, has cut shipments by 18% year-over-year according to Q3 2023 customs data. This decline coincides with: "Think of it like a domino effect," says a trade analyst at SolarTech Insights. This article explores the implications for manufacturers, buyers, and emerging markets, while offering actionable strategies to adapt to. Solar PV products are a significant export for China. In 2021, the value of China's solar PV exports was over USD 30 billion, almost 7% of China's trade surplus over the last five years. Jamnagar in Gujarat and Kanchipuram in Tamil Nadu are top exporting districts. Uttar Pradesh is emerging as an electronics manufacturing hub. Where possible, imports and. The PV module supply chain is undergoing transformation in 2024, marked by oversupply, policy uncertainty, and low prices affecting manufacturing capacity expansion and factory utilisation rates. Massive levels of imports, driven by Chinese overproduction of solar modules and components and exports.

## Nassau downgrades PV module exports

---

### [Nassau Downgrades PV Module Exports Impacts and Opportunities ...](#)

Summary: Recent reports confirm that Nassau has reduced its photovoltaic (PV) module export volumes, triggering ripple effects across global solar supply chains.

### [Annual Solar Photovoltaic Module Shipments Report](#)

This report includes summary data for the photovoltaic industry from annual and monthly respondents. Data include manufacturing, imports, and exports of modules in the United States and its territories.

### [2024 Monthly Solar Photovoltaic Module Shipments Report](#)

Data source: U.S. Energy Information Administration, Form EIA-63B, Monthly Photovoltaic Module Shipments Report Note: Includes both domestic shipments and exports.

### [The shifting sands of PV module supply - pv magazine Australia](#)

The shifting sands of PV module supply Chinese solar manufacturing capacity faces a downturn that is unlikely to translate into growth in other regions, writes S& P's Edurne Zoco.

### NASSAU SOLAR MODULE EXPORTS

Grew Solar has landed a groundbreaking deal valued at over Rs 2,000 crore with NTPC Renewable Energy Ltd, set to provide an impressive 1,464.5 MW of solar modules for renewable ...

### Executive summary - Solar PV Global Supply Chains

Global capacity for manufacturing wafers and cells, which are key solar PV elements, and for assembling them into solar panels (also known as modules), exceeded demand by at least 100% at ...

### New paradigms of global solar supply chain

In the backdrop of huge capacities likely to be set up in the U.S. under the Inflation Reduction Act (IRA), Indian photovoltaic (PV) module exports to the U.S. may experience a period of ...

## [International Solar PV and BESS Manufacturing Trends](#)

While domestic solar PV module manufacturing is rapidly expanding, hitting 80GW at the end of 2024, the country remains heavily reliant on Chinese solar wafers and cells, even as its manufacturers are ...

## [Spring 2025 Solar Industry Update](#)

- Utility-scale PV installations were aided by high module inventory levels. - The residential PV sector decreased overall growth, contracting 31% due to California's transition to NEM ...

## **2025 US Solar Report**

In January this year Cubic PV, a promising Massachusetts startup with innovative technology for producing solar wafers from polysilicon, announced it was canceling its plan for a volume ...
