

National Development and Reform Commission Photovoltaic Panels

Overview

China has announced a plan to establish a recycling system for retired solar PV panels. 17 -- Chinese authorities have released guidelines to promote the recycling of decommissioned wind-power and photovoltaic equipment, the National Development and Reform Commission, the country's economic planner, announced Thursday. It is also aiming to improve. The National Development and Reform Commission and the National Energy Administration: Focus on promoting equipment upgrades and technological transformation in the fields of power transmission and distribution, wind power, photovoltaic, and hydropower, and support the network-type transformation. Wind and solar resources are unlimited given by nature, but equipment components generating the resources have their lifespan.
