

# New Energy Storage Power Supply Price Trend

## Overview

---

As of early 2026, the global average installed price for high quality off grid systems has stabilized between \$350 and \$550 per kilowatt hour. In another record-breaking year for energy storage installations, the sector has firmly cemented its position in the global electricity market and reached new heights. From price swings and relentless technological advancements to shifting policy headwinds and tailwinds, 2025 proved to be anything. Summary: Discover the latest battery energy storage system (BESS) pricing dynamics, key market drivers, and actionable insights for commercial buyers. China, for instance, removed the mandate to install storage with new renewables.
