Overview

We teach you step-by-step methods for investing in solar module production. How much investment is needed for the machines?

What sizes do you need to start a solar module production line?

. Both NREL and private companies provide more sophisticated PV modeling tools (such as the System Advisor Model at //sam. While some concentrating solar-thermal manufacturing exists, most solar manufacturing in the United States is related to photovoltaic (PV) systems. Those systems are comprised of PV modules. Since 1998 the Italian company Ecoprogetti srl has been engaged in research, design and construction of turnkey machines and lines for photovoltaic production. All services are carried out internally, with the advantage of having a single point of contact from the order to the after-sales service. It includes corresponding PV facility information, including panel type, site type, and initial year of operation. • User: Any individual or legal entity using the services of PVGIS.
