

Plastic wing nuts for fixing photovoltaic panels

Overview

Plastic Wing C Strut Channel Nut is a kind of fasteners used for solar panel installation. They are made of plastic wings and corrosion-resistant metal materials, easy to install and remove manually, suitable for various photovoltaic support systems. Made from lightweight, durable, and recyclable plastic, they resist corrosion and withstand harsh environments. With an ergonomic wing design, they ensure precise fastening by hand. A plastic strut nut, channel nut, or spring nut is a specialized fastening component designed for use with strut channels and support systems in mechanical, electrical, and structural applications.
