Overview

Antbox Mining Containers are mobile solutions that allow miners to operate without a building to host machines in. Containers can be deployed near an energy provider of your choice, potentially allowing for higher profit margins compared to stationary facilities that are dependent on. According to the China Energy Storage Alliance (CNESA), new storage installations in China reached 13.1 GWh in the first five months of 2025, up 52%. Containers can be deployed near. Explore. Also, thanks to ECO Controller, Atlas Copco's Energy Management System (EMS), these units can be synchronized to increase the power offering to match the demand. In hybrid mode with a generator, the ZBC range increases the solutions' overall efficiency, accounting for the peaks of power and low. MOBIPOWER containers are purpose-built for projects where energy demands go beyond what a trailer can deliver.
