

# **Procurement of fast charging cabine photovoltaic chargers in north america**

## Overview

---

In a shocking but exciting announcement this morning, a group of some of the world's largest automakers has combined forces into a new joint venture to deliver a new “high-powered” charger network across cities and highways in North America to expedite EV adoption. EV technology in the United States, representing the largest commitment of its kind to date. Based on figures from the Council of Economic Advisors and US Department of Transportation related to highway and transit investments, this \$2. 0 billion is estimated to support up to 15,000 jobs throughout. The state Department of Transportation has issued a request for proposals for businesses interested in applying for federal funds to install and operate electric vehicle charging infrastructure along North Carolina's major highways. Each contract is the result of a competitively solicited. NovaCHARGE, a leading company in EV charging solutions for public, private, municipal and fleet applications, is proud to announce that our company has been added to the state of North Carolina's eProcurement system for all municipalities and state agencies.
