

Quote for a large-scale telecommunication BESS power station in Slovenia

Overview

Developer NGEN is deploying the largest battery energy storage systems (BESS) in Slovenia, Austria and Croatia, and wants to take its model beyond CEE too, CEO and co-founder Roman Bernard said. The Slovenia-headquartered company was recently in the news for a 20MWh project it commissioned in. It is estimated that the station can export 1.2 million kilowatt-hours of green power per day. Ever wondered how a country smaller than New Jersey is becoming Europe's hidden powerhouse in energy. Slovenia's state-owned utility HSE is driving the country's energy transition with the deployment of 800MW of energy storage by 2035, including 590MW of pumped hydro energy storage (PHES) and 150MW of battery energy storage (BESS). With Blackridge Research's Global Project Tracking (GPT) platform, you can identify the right opportunities and grow your pipeline while saving precious. The BESS system for the telecommunications sector is installed for BTS stations combined with solar panels, which is a more comprehensive solution for BTS stations in saving energy and limiting risks when depending only on the base power source.

Quote for a large-scale telecommunication BESS power station in SI

[Slovenia base station energy storage system](#)

The city's new 20 MW battery energy storage system (BESS) near the Sostro district acts like a giant energy savings account - storing solar power during sunny afternoons and releasing it

[Latest Battery Energy Storage System \(BESS\) Projects in Slovenia \(2025\)](#)

Search all the latest and upcoming battery energy storage system (BESS) projects, bids, RFPs, ICBs, tenders, government contracts, and awards in Slovenia with our comprehensive online database.
