

Report on rooftop solar power generation

Overview

Our bi-annual Rooftop solar and storage report, January to June 2025 shows that Australian consumers and small businesses continue to take advantage of Australia's abundant solar resources with rooftop solar accounting for 12.8 per cent of all electricity generated in the first half. BOSTON — In 2022, small-scale rooftop solar produced enough energy to power 5.7 million typical American homes, a tenfold increase over the last decade. That's according to Rooftop Solar on the Rise, a new report unveiled on Tuesday by Environment America Research & Policy Center and Frontier. Rooftop solar can reduce strain on the grid as electricity demand grows. Rooftop solar is cost-effective. In our latest Short-Term Energy Outlook (STEO), we expect U.S. rooftop solar to reach 6% in 2027, when it reaches an annual total of 4,423 BkWh.

Report on rooftop solar power generation

[Worldwide rooftop photovoltaic electricity generation may mitigate](#)

Our findings reveal that leveraging RPV systems offers a viable and impactful strategy for reducing carbon footprints and combating climate change globally, while advocating targeted

[Clean Energy Council Rooftop solar and storage report](#)

Rooftop solar and batteries continue to power the clean energy transition, now to focus on the next wave of participants.

Rooftop Solar on the Rise

We focus on problems that arise from our nation's material and technological wealth - the problems of abundance. We deliver timely research and analysis that is accessible to the public, applying insights ...

[New report: Rooftop solar delivers 10 times more power than a decade ago](#)

BOSTON -- In 2022, small-scale rooftop solar produced enough energy to power 5.7 million typical American homes, a tenfold increase over the last decade. That's according to Rooftop Solar on the ...

[CEC Report: Rooftop solar and storage biannual report](#)

The Clean Energy Council has released its bi-annual Rooftop Solar and Storage Report (July-December 2025), which shows that more than 183,245 battery units were sold in the second half of 2025.

[Research status and application of rooftop photovoltaic Generation](#)

This study reviews research publications on rooftop photovoltaic systems from building to city scale. Studies on power generation potential and overall carbon emission reduction of rooftop photovoltaic ...

[Worldwide rooftop photovoltaic electricity ...](#)

Our findings reveal that leveraging RPV systems offers a ...

[The Complete Guide to Rooftop Solar Power in 2025](#)

This comprehensive guide will walk you through everything you need to know about rooftop solar power, from understanding the technology to calculating your potential savings and choosing the right installer.

[America's Rooftop Solar Potential Still Remains Largely Untapped](#)

Rooftop solar power has experienced explosive growth over the last decade. America generated 10 times as much power from small-scale solar installations in 2022 as it did in 2012 - an increase of 55,322 ...

[Solar power generation drives electricity generation growth over the](#)

In our STEO forecast, utility-scale solar is the fastest-growing source of electricity generation in the United States, increasing from 290 BkWh in 2025 to 424 BkWh by 2027. Almost 70 gigawatts (GW) of ...

[Approximately 100 million households rely on rooftop solar PV by 2030](#)

Learn more about the report and explore the TCPs. The number of households relying on solar PV grows from 25 million today to more than 100 million by 2030 in the Net Zero Emissions by 2050 Scenario ...
