

San Jose cylindrical solar container lithium battery manufacturer

Overview

Lyten, based in San Jose, specializes in lithium-sulfur batteries using proprietary 3D Graphene technology. Offering double the energy density of lithium-ion and reduced environmental impact, their sustainable solutions serve automotive, aerospace, and energy sectors. Lyten uses that potential to build a practical battery without heavy minerals like nickel, cobalt, graphite, or iron and phosphorous. The result is an up to 50% weight reduction vs NMC and up to 75% weight reduction vs LFP. Today, its not possible to buy. With the battery technology and production industry as dynamic as ever, staff from San José's Office of Economic Development and Cultural Affairs and San José Clean Energy were pleased to attend the opening of Lyten's Lithium-Sulfur battery pilot line on June 14th at its new location in North San. Lithium Power, Inc. With a history of excellence in business building and strategy in advanced LCD technology, they recognized the future of untethered mobile. SAN JOSE, Calif. -- (BUSINESS WIRE)--Lyten, Inc.
