

Short side installation of photovoltaic panels

Overview

Horizontal installation is traditionally preferred on rooftops due to simpler cabling and lower wind load, while vertical installation performs better in drainage and architectural integration. Clenergy PVezRack® Ascent 1. 1 is a low ballast, south/ north, east-west facing solution for PV installation on flat roofs. With a special design and a maximum tilt angle of 10° and 15°, Ascent 1. This installation manual must. Whether to position panels in landscape or portrait orientation can significantly impact efficiency, installation feasibility, and overall energy yield. Solar Panels perform at optimum capacity when placed in direct sunlight.
