

Solar Photovoltaic Smart On-site Energy

Overview

There are three main types of onsite solar: rooftop, ground-mount, and carport. Onsite solar can benefit the offtaker in many ways, including progress towards renewable energy goals, visible commitment to sustainability, and electricity bill savings. It involves the deployment of solar panels or photovoltaic (PV) modules on rooftops, parking lots, or other available spaces on the. Onsite solar is an asset installed in the same location where the energy generated will be consumed. Controlling your own energy supply means more predictable and reliable energy generation that lowers costs and environmental. HUAWEI FusionSolar advocates green power generation and reduces carbon emissions. It provides smart PV solutions for residential, commercial, industrial, utility scale, energy storage systems, and microgrids.
