

## Overview

---

The global solar energy storage market was valued at USD 93.5 billion in 2024, at a CAGR of 17%. Government incentives for solar-plus-storage installations and net metering policies enhancing storage demand along with rising environmental concerns. This ESS Buyer's Guide is a comprehensive list of what each brand is offering in the residential and C&I space heading into 2025. We sent a questionnaire to every manufacturer to ascertain their top product and what components are included. The market is experiencing significant growth due to several key drivers.
