

Solar panels in the northwest interior of Uganda

Overview

A Private Infrastructure Development Group (PIDG) company has committed \$19 million to a new 20MW solar PV project designed to provide clean, affordable energy for one of the most remote and underserved regions in north-western Uganda. Let's explore how solar power is revolutionizing Uganda's energy landscape and the role it plays in shaping a brighter, more sustainable future. Uganda has one of the youngest and most rapidly growing. According to the World Bank, a recent solar energy project is set to benefit approximately 1.4 million people, highlighting the potential impact of solar initiatives in the region. 1 The annual kWh production per kWp installed.
