

Solar power generation sea row

Overview

Buffeted by waves as high as 10 meters (32 feet) in China's Yellow Sea about 30 kilometers off the coast of Shandong province, two circular rafts carrying neat rows of solar panels began generating electricity late last year, a crucial step toward a new breakthrough for clean energy. With its extensive experience in a wide range of construction projects, Sumitomo Mitsui Construction Co. The experiment by. Ocean-based floating solar PV systems present vast potential for untapped renewable energy growth, but research into marine environment deployment shows gaps and challenges in developing this nascent resource. This innovative approach.
