

Solar power generation system is not connected to the grid

Overview

Yes, it is ok to leave a solar panel disconnected. By staying connected, your system can send back excess electricity to the grid, and make. Interconnection standards define how a distributed generation system, such as solar photovoltaics (PVs), can connect to the grid. This. Professional Installation is Critical: Grid-tied solar systems require licensed electricians and multiple permits, with the interconnection process typically taking 2-8 weeks and costing \$200-\$2,000 in fees alone.
