

South Sudan energy storage project cooperation

Overview

A public-private partnership in South Sudan has launched the country's first major solar power plant and Battery Energy Storage System (BESS) in the capital Juba, where it is expected to provide electricity to thousands of homes. This is a major step in reducing the country's electricity access. Ezra Group, a South Sudanese family-run conglomerate, last month announced the launch of South Sudan's first major renewable energy project. Can solar power improve South. According to UC Berkeley's Renewable & Appropriate Energy Laboratory, reducing dependency on fossil fuels by increasing access to renewables could lower costs, improve public health and foster socio-economic stability in this conflict-affected country. Solar-powered refrigeration represents a.

South Sudan energy storage project cooperation
