

Spanish Gigawatt New Solar Company

Overview

Renewable energy producer Sonnedix has surpassed its first gigawatt of owned and operated capacity in Spain. This milestone was reached following the inauguration of the Betierra project, located in Cuenca and consisting of three solar PV power plants with a capacity of 50 megawatts. The company has reached this milestone by inaugurating a 150-megawatt solar PV power project in Cuenca. Together, these facilities are expected to generate 515. TotalEnergies' Seville solar project adds 263 MW of capacity, pushing its global renewables footprint toward a 35 GW target by end-2025. Project supports Spain's clean energy ambitions, helping drive the national goal of 80% renewable electricity by 2030.
