

Tallinn s largest energy storage solar power station

Overview

Utilitas is building Tallinn's largest solar park with a capacity of 9.3 MW in Vão energy complex. It will be named the European Green Capital Solar Park. „Cities generate ca 70% of the world's carbon footprint, which is why the green transition in the cities is particularly. As Europe races toward 2030 renewable targets, the Tallinn Power Storage Project has become a litmus test for grid-scale battery viability in northern climates. Operational since Q4 2024, this 240 MWh lithium-ion system supports Estonia's ambitious plan to derive 50% of its electricity from wind. Utilitas opened the largest thermal storage facility in the Baltic States, with a capacity of 1100 MWh, at the Vão energy complex in Tallinn, which enables to harmonise daily energy production and reduce the use of fossil fuels. The 1,100 MWh facility will help balance daily energy production, increase the. With Estonia's renewable energy capacity growing by 18% annually, the demand for efficient storage solutions has skyrocketed. Local manufacturers now export battery systems and smart grid integrations to over 30 countries, from Scandinavia to Southeast Asia.

Tallinn s largest energy storage solar power station
