Overview

Solar, wind, and batteries are set to supply virtually all net new US generating capacity in 2026, according to EIA data reviewed by the SUN DAY Campaign, continuing their strong 2025 growth. EIA's latest monthly "Electric Power Monthly" report (with data through Novem), once again. Developers and power plant owners plan to add 62. This addition would be 55% more added capacity than the 40.4 GW added in 2023 (the most since 2003). Global energy storage additions are on track to set another record in 2025 with the two largest markets - China and US - overcoming adverse policy shifts and tariff turmoil.

The first year of solar energy storage new energy storage

[Solar and battery storage to make up 81% of new U.S. electric](#)

With the rise of solar and wind capacity in the United States, the demand for battery storage continues to increase. The Inflation Reduction Act (IRA) has also accelerated the development of energy ...

[REPORT: Energy Storage's Meteoric Rise Breaks Another Record](#)

"After another year of record deployment, energy storage is solidifying its place as a leading solution for strengthening American energy security and grid reliability in a time of historic rising demand for ...

 LFP 280Ah C&I

[EIA: 99%+ of new US capacity in 2026 will be solar, wind + storage](#)

Solar, wind, and batteries are set to supply virtually all net new US generating capacity in 2026, according to the latest EIA data.

[SEIA Announces Target of 700 GWh of U.S. Energy Storage by 2030](#)

-- The Solar Energy Industries Association (SEIA) is unveiling a vision for the future of energy storage in the United States, setting an ambitious target to deploy 10 million distributed storage installations ...

[The Development History of New Energy Storage: From Lab Curiosity to](#)

Let's start with a mind-blowing stat: China's new energy storage capacity exploded from 3 GW in 2020 to 70 GW by late 2025 [1]. That's like upgrading from a tricycle to a bullet train in energy terms! But ...

[The Future of Energy Storage: Five Key Insights on Battery Innovation](#)

The rapid scale-up of renewable energy solutions like solar and wind power will need storage solutions to keep pace with their growth. What's more, the rapid growth in electric vehicle (EV) sales will ...

Energy-Storage.News

By the end of December 2025, China's cumulative installed capacity of new energy storage technologies including lithium-ion reached 144.7GW, representing an 85% year-on-year rise.

[Solar & Battery Storage to Make Up 81% of New U.S. Electric-Generating](#)

We expect U.S. battery storage capacity to nearly double in 2024 as developers report plans to add 14.3 GW of battery storage to the existing 15.5 GW this year. In 2023, 6.4 GW of new battery

[Comprehensive review of energy storage systems technologies, ...](#)

This paper presents a comprehensive review of the most popular energy storage systems including electrical energy storage systems, electrochemical energy storage systems, mechanical energy storage ...

[Global Energy Storage Boom: Three Things to Know](#)

Despite policy headwinds earlier in the year, energy storage additions in China and the US are set to continue growing this decade. The removal of storage mandates in China for renewables and the ...
