

The leader in hydropower wind power and photovoltaic power generation

Overview

NextEra Energy stands as the world's largest producer of renewable energy from wind and solar sources. The company operates approximately 24,600 megawatts of net generating capacity and has maintained an impressive track record with average annual total returns of 15.7% over the past. Solar generation rose by 306 TWh (+31%), driven largely by China's 55% share of the increase, followed by the United States, European Union, India and Brazil. Some companies outside of the U. report profits semi-annually, so the 12-month trailing data may be. To meet this growing demand, top renewable energy companies in the world are investing heavily in solar, wind, hydro, and other renewable projects, targeting to achieve 100 GW of gross installed renewable power capacity by 2030.
