

# The proportion of solar power generation in the United States

## Overview

---

Solar energy accounted for some 6.91 percent of electricity generation in the United States in 2024, up from a 5.62 percent share a year earlier. The Energy Information Administration reports that utility-scale solar grew by 32%, while distributed solar increased by 15%, bringing their respective shares to nearly 5% and 2% of total electricity generation. Get notified via. 82% of U. The report also looks at retirements, planned retirements, and cancellations since 2017.
