

Uninterruptible power supply for Swiss hospitals

Overview

This guide explores technical requirements, selection criteria, and real-world applications of uninterruptible power solutions in medical environments. Imagine a surgeon midway through an emergency procedure when the lights flicker. Monitoring equipment in ICU suddenly goes dark. Hospitals, medical centers, and healthcare organizations require reliable backup power to provide the necessary patient care. Hospitals and other healthcare buildings are full of. Intelligent Building Management Systems (IBMS), for instance, can coordinate everything from building operations to communications, and give hospital staff the ability to monitor, control, and integrate the proper climate for their patients through heating, ventilation, and air conditioning.
