

Universal Interconnected solar Inverter

Overview

Utility interconnected photovoltaic inverters are solar inverters that support efficient interconnection between photovoltaic power and the public power grid. They can charge batteries and loads and also feed electricity to the grid. While solar inverters are the most common type of inverter used for residential solar, they are just one of several inverter. Tesla Solar Inverter offers improved aesthetics, reliability and native integration with the Tesla ecosystem for both Solar Roof and solar panel systems. DC power coming from solar modules is inverted to AC power by Tesla Solar Inverter for home consumption.
