

Vanadium flow battery and sodium ion battery

Overview

Performance has been a stumbling block, but sodium battery researchers are developing new chemistries with the aim of surpassing the energy density of lithium batteries, and vanadium — not to be confused with vibranium! — has emerged as a key ingredient. Lithium-ion dominates the current market, but sodium-ion batteries and flow batteries are quickly emerging as competitive alternatives, especially for large-scale energy storage systems (ESS). (3 min. China Sodium Energy announced today that its subsidiary, Dingbian Zhongna New Energy Co., has officially signed a cooperation agreement with the Yulin Municipal Government and key industrial partners to launch its flagship “500MW Vanadium Flow Battery Manufacturing Project.
