

Various sodium-sulfur battery cabinet base stations

Overview

In this blog, we explore the top 10 sodium sulfur battery companies that are shaping the future of this innovative sector. These companies have been selected based on their market share, revenue. A sodium-sulfur (NaS) battery is a type of molten-salt battery that uses liquid sodium and liquid sulfur electrodes. Due to the high operating. (NGK), a Japanese ceramics manufacturer, have released an advanced container-type NAS battery (sodium-sulfur battery) *1. Sodium, the sixth most abundant element on Earth, is an attractive, low-cost material for industrial applications. They can additional power during demand peaks.

Here we report a 3.6 V class Na-S battery featuring a high-valence sulfur/sulfur tetrachloride (S/SCl₄) cathode chemistry and anode-free configuration.

Sodium Sulfur Battery

The sodium-sulfur battery is formed by combining the liquid states of the negative sodium and positive sulfur electrodes. Both electrode components are in a liquid state.

Providing at least six hours of energy storage, a 1.5MW NAS battery at Swanbank would be one of the first in Queensland and the largest grid-connected sodium sulphur battery in Australia.

Brochure NAS® Batteries

We supply containerized NAS® batteries. The compact form enables easy transportation and quick installation at a customer site.
