

Wangjing installs solar power generation

Overview

China has just connected what it believes to be the world's biggest solar power plant to the grid in northwestern Xinjiang. The plant covers an area of 33,000 acres (200,000 Chinese mu) and is reported to have an output of 6. In 2024 alone, China installed 360 gigawatts (GW) of wind and solar capacity. 4 terawatts (TW) - that's roughly a third of the entire world's 4. Chinese renewable generation reached 366. Global solar installations are breaking records again in 2025.

Wangjing installs solar power generation

[China breaks more records with surge in solar and wind power](#)

China's installations of wind and solar in May are enough to generate as much electricity as Poland, as the world's second-biggest economy breaks further records with its rapid buildup of

[H1 2025: China installs more solar than rest of the ...](#)

Solar surged 64% in H1 2025 with 380 GW added worldwide, led by China's record pace, keeping 2025 on track for new highs.

[Wind and solar generate over a quarter of China's electricity for the](#)

China achieved a new milestone in its energy transition, with wind and solar power together generating a quarter (26%) of the country's electricity in April 2025, the highest monthly ...

[China's solar capacity installations grew rapidly in 2024](#)

The 277 GW of utility-scale solar capacity installed in China in 2024 alone is more than twice as much as the 121 GW of utility-scale solar capacity installed in the United States at the end of ...

[China continues to lead the world in wind and solar, with twice as ...](#)

Wind and solar now account for 37% of the total power capacity in the country, an 8% increase from 2022, and widely expected to surpass coal capacity, which is 39% of the total right ...

Solar energy in China

So there is a lot of uncertainty in the Chinese solar industry, but there are also irrefutable facts: China needs to continue to expand domestic solar capacity to reach its climate target .

[China Solar and Wind Installations Break More World Records](#)

China is leading the world in new solar and wind installations and doing so at a record-shattering pace. In May 2025 alone, the country added 93 gigawatts of solar capacity, or nearly 100 ...

[How China adds more renewable energy than any other economy](#)

China is adding more solar and wind power to its energy grid than any other economy - but that huge buildout has its challenges. Here's what we can learn

[China Installs Record 93 GW Solar Capacity in May 2025](#)

China added a record 93 GW of solar power capacity in May 2025, the highest-ever monthly figure, demonstrating the nation's unwavering commitment to renewable energy transformation and climate ...

[China opens world's biggest solar farm that spreads ...](#)

China has just connected what it believes to be the world's biggest solar power plant to the grid in northwestern Xinjiang.
