

# What are the small container stations for hydrogen energy in Dominica

## Overview

---

miles of land, the Caribbean Island has potential to develop over 1GW of geothermal capacity, while the government has been exploring a green hydrogen industrial development plan. Chief Executive Officer (CEO) of the Climate Resilience Execution Agency for Dominica (CREAD), Francine Baron said a framework agreement signed on Wednesday, which proposes to develop a project in one of Dominica's six geothermal zones, will involve the construction of a hydrogen production. Dominica, known as the "Nature Isle of the Caribbean," has been actively pursuing sustainable energy solutions to enhance its energy security and reduce reliance on imported fossil fuels. As of 2022, Dominica's Gross Domestic Product (GDP) was approximately over USD500 million. There are three hydroelectric. LBST has operated the database h2stations.org since 2005, offering the most comprehensive information on hydrogen refuelling stations worldwide.
