As the demand for backup and off-grid power sources continues to rise, so does the search for home generator alternatives. Whether you're looking for something quieter or just something a little more conducive to your living circumstances, here are eight generator alternatives that don't require. I'll likely be running a Trinket with no more than a dozen or so LEDs on each, but I'd need to waterproof not only the bulb (I'm sure copious amounts of hot glue will be fine) but the plug itself would need to be 2 prong ONLY (those little piggy back plugs never have the ground post) and not be. This means relying on alternative power sources such as solar, wind, and other renewable energy systems to meet energy needs. According to a report by the International Renewable Energy Agency, the adoption of off-grid solutions has been on the rise, especially in remote and rural areas [1].
