

Will solar power be generated in April

Overview

Experts say the April 8 eclipse will interrupt solar power generation and put a strain on the power grid. But grid operators are prepared for the reduction in energy production. Image via Zbynek Burival/ Unsplash.

Will solar power be generated in April

[How the eclipse will impact solar power: April 2024 eclipse news](#)

The path of April's total solar eclipse will be so dark that Texas electric grid managers are forecasting a sudden, brief drop in solar power as the eclipse crosses the state, but experts

[April's eclipse will mean interruptions in solar power generation](#)

On Ap, another total solar eclipse will track across the U.S., causing perhaps an even greater loss of solar power generation.

[How the total solar eclipse will impact electricity supplies](#)

On Ap, another total solar eclipse will track across the U.S., causing perhaps an even greater loss of solar power generation.

Even with the eclipse, we still expect solar generation to be the third-largest contributor of electricity in the United States on April 8, behind natural ...

[April 8 solar eclipse will briefly limit solar electricity generation](#)

Even with the eclipse, we still expect solar generation to be the third-largest contributor of electricity in the United States on April 8, behind natural gas and nuclear.
